New York city appropriates over a million of dollars annually to her system of public education. Boston appropriates about as much to education as to all other city purposes besides. We have not the statistics of other Eastern cities, but they approach in magnitude New York and Boston in the supplies to public schools. The theory is, that the property of the country shall furnish all the youth with the means of education. The New England States have put the theory to a a great extent is practice, and the other States are following the example. Education is so important and indispensable that it must be rovided for; left to individual and voluntary efforts, and it is neglected. Experience has shown that upon this system, ar rather lack of system and rather lack of system. system, ar rather lack of system, education cannot be general. On the other hand, some hold that i is too much to expect of government to provide for the education of the people; that if we look to government for so great a boon, we must grant to it an amount of obedience commensurate with the favor expected; that it is inconsistent with the sound principlo, that the less government the better—that the government is but the servant, denying the legality of this legislative body, ap a benefactor of the people.

The reply to this objection is, that the education of the masses of the people is indispensable to free government; that its existence, it is essential to provide for; and that the education of the people is a necessary means te this end. Let the people be educated, and they will take care of the government; on the other hand, an ignorant people will never support permanently a free government; and experience has proved that unless education is provided for out of the general revenue, the mass of people, or a great portion of them, must be ignorant.

It is not our purpose, at present, to discuss this point. In our judgment, the means of education must be supplied to all. Gov. rnments and individuals are not likely to do too much; and whilst they are educating the youth they are doing no harm, and must do good. But the point is this? What good has this gen-

eral education done so far? Where the greatest offerts have been made, and the education of the people most general, is there an improvement in virtue, in religion, or politics? Does education secure men at all from vices and follies, or obiquities in religion or politics? New England, and especially Massachusetts, has made the most liberal and successful efforts in the cause of education and what are the fruits? Look at her statistics of crime and pauperism, her bigotry, her follies, and then the South, at least, will raise no question absurdities in legislation, and say, are these the fruits of education? It is notorious that her last Legislature perpetrated follies of the most disreputable character, besides making a criminal effort to nullify the laws of the United States, The world has a tolerably uniform standard of morals and propriety, and Massachusetts approaches no nearer to it than her neighbors: whilst in politics and religion the rest of the States will not consent to take her as an example.

Drunkenness not Cured by Legislation. An effort is at present being made in Great tain to enact a prohibitory liquor law, simila in its provisions to what is termed, in this country, the Maine liquor law.

The October number of the Westminster Re view has an article on the subject, suggesting some arguments against this sort of legislation, which are worthy of serious consideration. We extract the following paragraphs:

the following paragraphs:

The world would be a very different world if great evils were so easily cared, and if ten lines in a statute book could cure vice and make virtue triumphant. Experience tells a different tale. It tells us that a law is in itset, powerless, and that it is only strong when it is the outward an 1 tormal expression of what men really wish. Even if a law, such as the Maine liquor law, were obeyed, which it might be for a time among an orcerly amulaw loving people, there would be no escaping, in one shape or other, the penalty of so gross an intringement of the true principles of State government. It would be an evil worse than that of drunkenness, if a nation learnt to lean on the rotten real of external enactments, and thus sapped the very foundations of right, and destroyed the springs of all moral action.

To deny the use of intoxicating liquors altogether, to withhold by law the means of indulging because indulgence is often carries to a victous excess, is, in fact, an attempt, fina very signal instead on a very wide scale, to increase the spherol tistate government, and to describe the increase the spherol tistate government, and to describe the construction of the conspicuous example of that mode of circling man and morals, which makes wrong and right the subject of State policy and not of individual conviction.

We publish, in another column, from the St. Louis Democrat, some of the doings in Kansas, as a part of the history of the times; also, a notice of the transactions in Parkville, Mo.

The Legislature of Kansas elected, in pursuance of the Territorial organization, fixed the day to elect a Delegate to Congress. Wnitfield was chosen by a large majority, but a public meeting, pointed another day, and voted for Reeder. They also appointed a day for the election of delegates State. These delegates are in session, and the article we publish contains the proceedings of that

The excuses for these disorderly proceedings are, that the Legislature was elected, in part at least, by Missourians, who had no right to vote and that it adjourned from the place at which it was appointed to meet after its organization, and, in consequence, was no longer a legal body. The braska resolution passed he would move a resolution of a people to decide a legal question of this BIRTH OF FUTURE PARTIES.—The Convention sort, and set up revolutionary proceedings as a remedy, is preposterous enough. The proceedings Delahay's "Nebraska Resolution," and the amend at Parkville are of the same lawless sort, on the ments officred to it. other hand. No party North or South can for a

noment justify such things. The movements in Kansas are intended to com plicate and embarrass the action of the Federal Government, and will be seized npon to accom plish the purpose of the agitators of the slavery

It is to be hoped that Congress will disregard these revolutionary and lawless doings. Whenever there is a sufficient population in the Terri tory, let them elect delegates and form a Constitntion, according to law, and such a Constitutio as will suit the majority of actual residents, and against her admission. The friends of our Terri torial policy will see it carried out in good faith and will not sanction the disorderly and lawless acts of one side or the other. If the Legislature was a lawless body, let the Courts decide it so; if violence or fraud gave Whitfield his seat, it is a question for Congress to look into and dispose of, and not for a rabble in Kansas to decide.

HON. W. P. BULLOCK, JUDGE. Sandusky City Bank, Plaintiff, against Moody,

This suit was on a premium note given Gwathing by Moody on a policy of insurance for twelve months on some property. Gwathing was acting as the agent of the Columbus Insurance Company, and took the note payable to himself, and handed over to the Company; thoy give it to plaintiff without Gwathmy or the Company's en-dorsoment on the note. The Company, Gwathmy and Moody were made defendants. Moody an-swered and said that plaintiff had only an equitaole interest in the notice that his defence was equitable; that the Company had failed in one nth from the time the policy was issued; that there was no consideration for the note; that he was compelled to insure in another office the same

property by reason of the Company's failure.

The plaintiff demurred to the answer, and insisted that the defence was not equitable; that the enbsequent failure of the Company is no defence to the note sued on; that the undertaking in such cases are mutual; that the insurer undertakes to indemnify and the insured to pay, and the promise of each is a good consideration for the promise of the other. A failure to perform on either side might be a ground of action, but cannot be a failure of consideration and cited. Howeves, Boyed, 1st Sandusky S. C. R., 481, to sustain his opinion. The defendant, Moody, contended that the defence was equitable; that a part if not all the consideration for the note had failed; that the policy was for a year, and the Company had failed in one month after the policy was taken out, and after that time the defendant was not indemnified by

that Company; that the Company was in fact oroke when they insured, but the fact was not known for a month afterwards, and therefore there was no consucration for the note; that no was forced, by the failure of the Company, to insure the same property for eleven months in another office, and the amount he paid for those cleven months was reasonablo, and ought to be deducted from the note sued on.

THE THEATRE.-As we expected, the theatre was crowded last night, with an andience that emed as if it never would tire of witnessing Miss Robertson's beautiful personations, or hanging warbling of nature's songstress, especially when she sings it is full of pathos and beauty. Her style of acting, too, is so free, natural and easy; that added to beauty of face and form, she becomes irresistible. You look upon her smiling, and you are instantly betrayed into a smile; she laughs from the heart, sings from the heart, talks from the heart, and to the heart. As Hans in the Young Actress, her song of faderland was touchingly beautiful, melting in pathos and sweet in its bird-like warbling. There is a charm in her atvie that captivates all hearts, and binds them in breathless silence

To-night she will appear in a new piece written expressly for her-a fairy piece, and repeat the Young Actress. The performances will commence with the farce of the Turtles. If you want a seat

THE F AIRS.—The strangers who are in our city o-day, and our citizens generally, cannot spend their time more delightfully than in visiting the Fairs now being held at Odd Fellows' Hall and at nce was the Hall of the Union Engine Company. daughters of the city. It affords us much pleasure to acknowledge the eccipt of a most bonntiful and luxnrions supperthe gift of the generous and considerate ladies connected with the Fair at the Union Engine House, such a gift is always acceptable, but coming as it does from the liberal-hearted ladies of the Falr, to those debarred by the pressure of their nightly labors from personally participating in the pleasure and enjoyment of the Fairs, it is doubly prized. Our most earnest wish is that the success of the Fairs may be commensurate with the generosity of those connected with them. The Fair at the Hall of was no consideration for the noto; that he was the Union Company, is nightly increasing in attractiveness, and will doubtless prove reinnnerative. Both Fairs are delightful resorts, and should be liberally patronized.

We understand that oysters and other refresh ments will be served up to-day, for the accommodation of strangers who may be visiting the city, at the Hall of the Union Fire Company.

MURDER AT WINCHESTER.—James Cleveland, a carpenter, late from Montgomery, was killed at Winchester on Saturday night, the 16th, by B. F. Owsley, another carpenter. Both had bean drinking and both were at work in a shop at night, by themselves. About 10 or 11 o'clock, Cleveland staggered into the counting-room of the Natlonal Hotel, bleeding from a horrible wound on the side of his head, which he said Owsley had inflicted with his hatchet. The corner of the hatchet had ponetrated the brain, and he died in about half an hour. Deputy Sheriff Lisle wont to the shop to arrest Owsley, who, upon seeing the officer, made at him with a knife, as hisle thought, whereupon he immediately knocked him down with his club. Owsley was examined and committed in default of bail in \$2,000. As no third person was present, nothing is known of the circumstances under which the blow was struck. A bloody hatchet was found just outside of the shop, and identified as belonging to Owsley,—Cammonwealth.

A Reprieve.

We de not refer to a reprieve from capital punishequally desirable. We refer to Dyspepala-a word in which all the horrors of Indication are summed an Taylor's NEW ment. There is a alow torture from which a respite is which all the horrors of indigestion are snmmed up. To the sufferers by this painful and harrassing disease, we can hold out, set only bright hopes, but the certainty of Immediate relief and permanent ones. There is a tonle, cordial, and alterative principle in HOOFLAND'S GERMAN BITTERS which inevitably arrests and changes the mor-bid action of the stomach and the secretive organs, removes the disease, and restores to health. Prepared by Dr. C. M. Jackson, Philadelphia. nof4 deod&w2

Palpitation of the Heart, Nervous Discase Complaint, Neuralgia, Dyspepsia, Costiveness, and Piles, are all relieved and cured in an incredible abort space of time by CARTER'S SPANISH MIXTURE, the great tonic and purifier of the blood. It contains net a particle of Mercury, Opium, or any noxious drug; is perfectly harmless, and has cured more than five unndred cases of disease.

We can only refer the reader to the certificates, a few

of which may be found in another column, and all of which are detailed in full around the bottle. It is the greatest of all spring and fall medicines, and possesses an influence over the blood truly remarkable. nol deod&w4

The Union says it is authorised by the Stat Department to say that Mr. Buchanan had two conforences with the Earl of Clarendon, in relation to the West India squadron. The Earl declared that the squadron had been dispatched for no purpose unfriendly to the United States. Its object was to protect the commerce of Great Britian against Russian privateers—three or four of which were fitting out at New York—one being nearly ready to go to sea.

This particular vessel was a large, fast clipper, specially intended to intercept the British ships conveying gold to Europe from Australia, with the

THE PROPRIETOR OFFERS
this valuable Medicine to the public with confince that all who may use it will not fail to receive the subsene tried, it has proved superior to any other decicine of the kind now in use.
The thousands who have used it testiff to its excellat virtues by the continuance of i use. To those he have not used it, we would say, TRY IT, and they ill find that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to be, and that it is all it is represented to very disease, or where it is open in the same minimal cause. The great variety of symptoms and forms of disease, is owing principally to difference in age, sex, constitution, and habits of the sufferer; but as the cause is tho same, they will all qually yield to a remedy that is competent to overcome or remove that cause.

The the Afflicted.

The the Afflicted.

The providence of the individual to the forms of disease, is owing principally to difference in age, sex, constitution, and habits of the sufferer; but as the cause is tho same, they will all qually yield to a remedy that is opened. The providence is a policy and the providence is

necessary.

In its operation upon the poison in the system, it will immediately relieve all the distressing symptoms of billions or ague diseases, and when the disease is cured, it will entirely prevent the accession of GENERAL DEBILITY AND NIGHT SWEATS,

And pursue their respective avocations in perfect safety from ague and bilious attacks during the sickly season, which is often to them the most valuable part of the year.

Since the introduction of the CURE in every part of the United States, its success has been so complete and univarying as to have fully proved these assertions in favor of its extraordinary merit.

When these declarations were made, at the date of its introduction, they seemed incredible to many, even of the most candid minds, because all the reseurces of science had been taxed in vain to subdue ague or hillious diseases; and what was still worse for ague sufferers, all their remedies or treatment, whether scientific or empirical, have been limited to the use of poisoneus or destructive drugs, such as Arsenic, Quinine, Mercury, Salicine, &c. The effects of these are sometimes worse than the disease they subdue; and when such remedies fail, or give only temporary relief, their poisonous effects are superadded to the poor sufferer's first complaint.

On this account ague sufferers should be particularly

WORTHY OF PUBLIC CONFIDENCE,

BECAUSE OF ITS BINGULAR AND ENTIRE HARMLESSNESS,

The following certificate, from one of the most celebrated chemists in the United States, has been obtained, and a copy of it is attached to every hottle:

NEW YORK, June 11, 1858.

"I have made a chemical examination of Rhodes, there and Ague Cure, or Antidote te Malaria, and have tested it for Arsenic, Mercury, Quinine, and have tested it for Arsenic, Mercury, Quinine, and Strychnine, hut have not found a particle of either in it, nor have I found any substance in its composition that would prove injurious to the constitution. "JAMES R. CHILTON, M. D., Chemist." It is a stubborn fact, therefore, that this Remedy is lestined not only to relieve the human family from ma arious diseases, but to do an equally good work by preventing the taking of other medicines which do harm. The entire absence of any baneful ingredient makes his Remedy, not more valuable as a Cure, than it is an preventing.

HAD THE AGUE FOR TWELVE YEARS!!!

PROVIDENCE, June 25, 1855.

Having been informed of the illness of a poor, but worthy woman, who has not been free from Fever and Ague a month at a time for the last twelve years, I supplied her gratuitously with lithodes' Fever and Ague Cure. She took in all four bottles, which completely restored her lo health and strength, and as four months has now elapsed, there is no reason to doubt the permanency of the cure.

I am also aware of many other cases in which it has been used, and have never known it to fail.

C. A. P. MASON, Apothecary.

WAVELAND, IND., Sept. 2, 1855.

MR. J. A. RHODES:—Please express me four dozen of your fever and ague Cure—send it immediately, as 1 am nearly out. It has given satisfaction.

K. W. GAMBLE.

PINE RUN, MICH., July 21, 1855.

DR. J. A. RHODES.—Dear Sir.—Your Cure for the Fever and Ague has thus far performed wonders. It has not failed in one instance to perform a quiex and permanent cure. Some who have been troubled with the distressing disease have been extingly Cure by using only one bottle of the CURE. Please send us immediately four dozen, as we have but three bottles remaining. Truly yours,

SOUTH DEDHAM, MASS., August 25, 1855.

DEAR SHE:—You wished me to write as to the health of my patient, after taking the Fever and Ague medicine you sent, which I now take pleasure in doing.

The pstient was my mother. She has lived in Alleghany county, N. Y., Gerfore years, and last fall, for the first time, had the Fever and Ague, which she cured in a short time by the use of " Yever and Ague Pilis; but last March she came here to live with me, and in May was taken again with it. She has taken the medicine which you sent—she took the last some four weeks ago—and she seems to be cured of the disease, and her health is quite good now, but he rionts and bones seem to be sore, and pain her some.

The medicine I think is very good, and I could recommend it to Ague sufferers, and I would procure it before any other within my knowledge for that disease. Yours truly, CHARLES B. KNOWLTON.

PROVIDENCE, Ill., Aug. 9, 1855.

DEAR SIR:

I might as well mention here that every bottle that I have heard of being sold has given good satisfaction. The agents that have left medicine with say that it ranss among the best of patent medicines, and that after its good qualities once become knewn there will be more of it sold than
